ABOUT ME

As a passionate Computer Science and Engineering student, I have worked on software development, project management, and front-end development. My Google, Meta, and NPTEL certifications show that I am committed to learning technologies like Java, cybersecurity tools, and front-end frameworks. I want to use new technologies and creative ideas to solve problems in the real world.

PROJECTS

Undrstanding AI   **Jul 2025**

Built an interactive coding assistant that guides users through programming tasks without providing direct code. Designed a two-mode interaction system ("Learn" or "Code") enabling step-by-step mentorship, conceptual support, and syntax hints. Integrated a custom in-app documentation library, AI error analysis, and logic coaching using the OpenRouter DeepSeek model via a FastAPI backend. Developed a minimal, playful UI aligned with Dieter Rams' 10 principles of good design.

CareerCraft AI   **Jun 2025**

Developed an AI-powered career guidance platform offering personalized recommendations using Python, Flask, HTML, CSS, and JavaScript; awarded Best UI/UX Prize at Hackvyuha 2025 for exceptional design and user experience.

Library Management System   **Dec 2024**

Developed a comprehensive application to manage library operations using HTML, CSS, JavaScript, PHP, and MySQL; won Second Prize in College Mini Project Competition for effective implementation of database management and user interface.

Voice Assistant Chatbot   **Sept 2022**

A voice based chatbot designed implementing Python to assist users with various tasks and queries.
